JERZY DROZD[®]

B A S S E S

From the first time you get any of Jerzy Drozd instruments in your hands you will discover all his qualities: ergonomic body, superbly carved neck, flawless neck union to the body is like an invitation for timeless playing sessions

No matter which model you choose you will find always best quality. All basses are made from the same high quality components: woods, pickups & electronics, bridges, hardware etc..., so you can expect the same best quality and performance from Basic™ thru Signature™ and Legend™ basses.

Here in Jerzy Drozd shop we give you possibility to customize every detail of your future OBSESSION™ bass. Any detail like woods, dimensions, scales, electronics, inlays or finishes can be adjusted to your personal taste.

Many fine detail are taken in account when we elaborate our instruments: recessed bridge and control knobs, rear cover plate and wooden knobs are only a part of them.

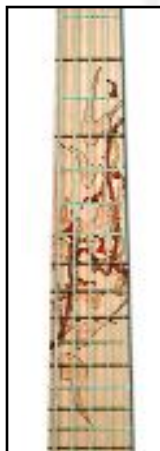

Our capabilities of creating basses with magnetic and piezo pickups and our last entry OBSESSION™ Legend bass with MIDI interface allow you for unlimited creativeness.

Jerzy Drozd

OBSESSION™ V Prodigy 36 fretless left hand with EMG pickup & 3 band electronics strung as right hand bass.

INLAY WORKS Thanks to last and most advanced technology, now we are capable to offer you our CAD/CAM designs possibilities. Basically it consist in possibility to design an inlay designs right from your drawing directly into computer, then we send it to our virtual visor which permits to see your design virtually with natural textures of woods, mother of pearl or abalone applied to your design. This way you can see your inlay finished before it really exist (done) ! Further more we can post that inlay design in JPEG format to your e-mail address so you can verify if kind of wood or shell chooseen on it is right to your expectation and personal taste.

We offer wide variety of inlays. From simple designs to very complex works. Custom inlays are also available. As material we use different variety of shells and woods. Please, check out frequently our Website page: <http://www.jerzydrozdbasses.com/inlays.htm> for more examples. You can choose one of inlays from our library or put your own design on your bass.

Bridge Our bridges are machined from brass alloy for full resonant capabilities. Fully adjustable in

height and spacing. Also available in Piezo version for acoustic sound and basses equipped with MIDI systems.

control knobs

As well as nut, our knobs are hand made from wood species providing more pleasant look and great feel. Wooden knobs helps to reduce overall weight of the instrument too.

Nut Entire line of our instruments are equipped with ebony wood nut.

Ebony is a hardwood which add more natural and acoustic sound to the bass.

WOODS Great sound foundation start in right selection of the wood and seasoning conditions. To learn more about our woods visit our web page <http://www.jerzydrozdbasses.com/woods.htm>

Lightwave Jerzy Drozd Basses also offers now LightWave™ system on whole line of our basses. LightWave System's Optical Pickups offer the first opportunity to acknowledge and surpass the limitations of conventional pickups, capturing a greater fundamental of sound and far more clarity than was previously possible.

Three versions There are three basic versions of basses in the OBSESSION® series: Differences in body shapes 24, 28 and 36 frets.

The 24 fret model: our standard suited to all styles.

- The 28 fret model: Since OBSESSION bass has been designed firstly with this body shape.

Good for extended chord and tapping playing, slap style is still possible but due to narrower spacing

between fretboard and bridge it may takes more time to get on the way.

- The 36 fret model:

This model is outstanding for extended soloing and chord work and an interesting option for fretless basses. Body designs are very ergonomic and comfortable with carved tops and backs to suit your body perfectly.

They comes in one piece and two to five laminated constructions.

MIDI Jerzy Drozd offers custom MIDI option on OBSESSION™ basses. The MIDI signal is created from Piezo bridge (bridge & tailpiece) with RMC piezo transducers and internal RMC Piezo/MIDI module. This system allow you to mix electric, acoustic and synthesized sound or use them independently. Our MIDI basses are compatible with **AXON** and **YAMAHA** MIDI interfaces and planded for **ROLAND** Virtual Bass device.

...Beyond of any canon. Fusion your favorite two basses into one unique Bass ...

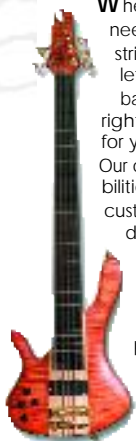

with a beautiful... gold hardware.

custom options

Whenever you need simple 4 string or 7 string lefthand 36 fret bass, we have right instrument for you.

Our custom capabilities allow us to customize any detail of your future bass.

Even more: we can develop special project for your particular needs.

doubleneck basses Basic™, Excellency™, Mastery™, Prodigy™, Signature™, Prodigy L.E.™ are available in doubleneck versions.

Pickups & Electronics

Our instruments are equipped with Bartolini pickups and electronics. X-shape pickups are used as standard on all basses except Prodigy L.E. series.

Several models of preamps like NTBT; NTCT; NTMB and NS2NTMB18V are used thru entire line of our basses. Other brands like EMG; Seymour Duncan etc... are also available as a custom option.

Our open architecture design of cavity permits installation of many kinds of electronics and knob layouts. Furthermore you have possibility to add to your bass additional controls like pasive/active switches among others or upgrade your pasive or 2 way bass to 3 way active electronics without special work.

www.jerzydrozdbasses.com

...Our approach to bass building is very simple:

For us is an science, meaning high precision, hi-tech components.
Also it's a fine artisan work, meaning special attention to every detail
and finally is an Art.

We are specialist in all types of bass guitars, from the standard four string
models
to ten string monstrosities, including doubleneck, passive or active electronics,
and infinite varieties of woods and finishes.

Our basic line of basses called OBSESSION is available in 5 models al in 4
to 7 string version. We offer unlimited option on these basses.

You set your own limits !...
